DataMagine

MAXIMIZE YOUR BOTTOM LINE

A Complete Document Management Solution Suite

Everything You Need. Nothing You Don't.

Agilysys DataMagine document management suite provides a complete document management and archiving solution. Select just the modules that best fit your needs, without the cost of extra features you don't. Each of these optional modules are designed to not only complement, but to bring efficiency and cost-savings into your business processes. With the seamless integration to PMS and other technologies, Agilysys DataMagine is well-suited for hospitality enterprises.

Find What Works For You:

Document Imaging Host
Scan and import documents quickly and easily with the Document Imaging module, which seamlessly integrates with virtually all business applications running on any platform. Simply define a "hot key" and the software will extract unlimited indices from a business application screen to index and/or instantly retrieve electronic images. The Document Imaging module can be implemented in days — not weeks or months — and provides a rapid return on investment.
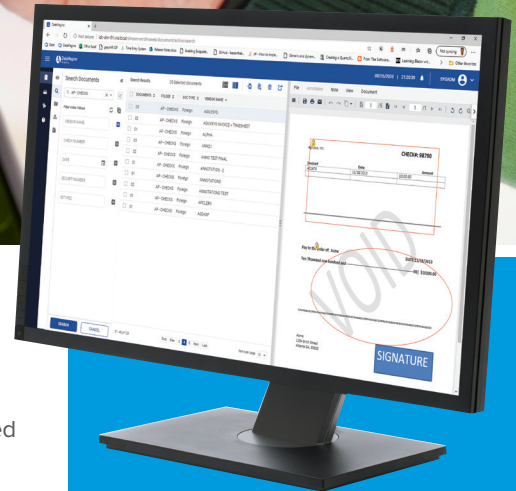

Signature Capture Integration
Ensure compliance with Payment Card Industry (PCI) standards by letting your guests swipe their own credit cards. When used along with Agilysys Versa or Agilysys Lodging Management System (LMS) property management solutions, a guest check-in screen is displayed on a signature capture device along with your property's logo, terms & conditions and a signature line. Once your guest signs, the transaction is automatically archived with multiple indices, including: guest name, room number, guest folio ID, date, etc.

Report Archive & Retrieve
One of the easiest ways to reduce paper is with the Agilysys DataMagine Report Archive module, which automatically indexes and archives any system-generated documents or reports to be accessed at any time by the appropriate management and staff. This process is proven to save paper, ink, processing, distribution and printer maintenance costs and provides easy access to important documents.

DocFlow Routing
Provides electronic routing for enterprise document approval and processing. Users can quickly route any business document electronically and automatically, based on pre-

agilysys

set parameters set by administrators, increasing efficiency and decreasing the possibility of human errors. Email approvals, along with reporting, add significant ease-of-use for managers and executives. Streamline your Accounts Payable and audit processes.

Email Attendant

Monitors incoming email messages, routing them to specific users so they can launch a DocFlow job or automatically index and archive an email attachment. The Attendant module also supports the documents with barcodes.

e-Forms Module

Transitioning from manual forms to electronic documents is proving to reduce the time and cost of operating your business. With seamless integration to your PMS and other hospitality technologies, this e-Forms Module streamlines daily processes to boost guest service. Take charge of your important forms for HR, Accounting and Operations.

e-Waivers

Allow guests for spa, golf and other activities to sign waivers using the system's secure tablet-based electronic signature capture. Captures waiver data and electronic signature, producing a retrievable PDF file.

Barcode Processing

Especially valuable for Human Resources and Accounts Payable, this module detects barcode(s) on a scanned document and automatically indexes the associated document into the imaging system. Apply barcode separator pages to a batch job and propagate barcode values from a single page, using those values to index pages that follow.

Portable Search & View with Client

Export archived images onto a fully-searchable, self-contained data storage device. This module makes for a great overall efficiency.

tool for auditors, customers and vendors who may not have access to the Agilysys DataMagine application.

Agilysys DataMagine Link

Capture documents and link them to other solutions, such as Agilysys Stratton Warren System (SWS), Eatec®, Lodging Management System (LMS®) and the Versa suite. Attach and view documents that are linked to transactions within other integrated applications in your business.

Export and Purge Module

Provides an easy way to export objects out of Agilysys DataMagine or delete documents according to company retention policies.

ID, Driver's License and Passport Scanning

Secure guest ID data with quick and easy scanning of driver's licenses, passports and other forms of ID directly to your Agilysys property management solution. Guest information, along with a snapshot of that ID, is automatically archived for fast and easy retrieval. Also accessible by casino floor operators.

Index Update Module

Offers the ability to extract field values (indices) from an external database file that was not available during the initial indexing of the documents. The retrieved value is populated into the Agilysys DataMagine index record automatically.

Full Web Client

Provides browser-based access to documents in Agilysys DataMagine. It's easy to scan and index individual documents and/or batches utilizing the patented functionality that links to business applications via a user-defined "hot key".

Web Services

Enables users or third-party programs to access the software remotely via the web. Whether you need to search, index, print or route documents, this module improves

Transform the time-consuming, manual tasks of everyday document and process flows into an efficient practice that also promotes environmental stewardship.
