

CUSTOMER SPOTLIGHT: **7 CEDARS CASINO**

**7 CEDARS CASINO SELECTS AGILYSYS
VERSA PROPERTY MANAGEMENT SYSTEM
FOR ITS HIGHLY ANTICIPATED RESORT**

7 Cedars Casino in Sequim, Washington is implementing Agilysys Versa PMS at its new resort set to open in summer of 2020. Agilysys' Versa PMS will work in conjunction with other already implemented Agilysys solutions to enable a more comprehensive guest view.

As 7 Cedars Casino takes the important step to elevate the 7 Cedars guest experience, it required an expansive and tailored PMS solution with the power to integrate with their food and beverage inventory solution and retail point of sale system.

“Being able to see and control everything in one place makes all the difference. When we are having to go to different software suites for reporting and analysis and are bogged down with having to create or find reports, we are taking valuable time and focus away from providing our guests with the best and most authentic experience possible. Being able to get a concise one pane view will help us be more efficient and allow us to spend more time with our guests to serve them better. That is going to be a real differentiator for us. And, that is what will keep them coming back time and time again.”

-- - Debbie Wardrop, Hotel Manager

Agilysys Versa, along with the Casino's existing Agilysys solutions will provide 7 Cedars a 360-degree guest view with its wide range of features and functionality, including front office operations, guest history, housekeeping, reservations management and more.

“We started with one Agilysys solution three years ago—Agilysys InfoGenesis® POS, and now, after Versa is implemented, Agilysys will be ubiquitous with 7Cedars—present in our retail, F&B, resort and golf operations. That speaks to our partnership and to what Agilysys has been able to accomplish as a hospitality solution provider—putting them at the forefront of our decision making to help us accomplish our business goals in a way that's profitable and successful.”

-- Jim Hough, Director of IT
